

1st European Beckman Coulter Life Sciences Conference for Cell Therapy, Gene Therapy and Synthetic Biology

November 9-10

Virtual Summit 2021 November 9-10

During our innovation series of talks, you will hear from your peers about the latest trends in Cell Therapy, Gene Therapy and Synthetic Biology. Our Round table experts will discuss the future of these markets, potential roadblocks and how these can be overcome in the future.

Agenda Day 1

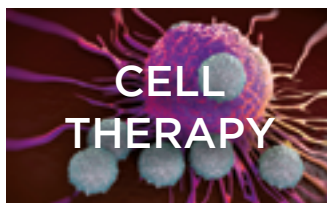

9:30 a.m. -
1:00 p.m.

1:00 p.m. -
3:00 p.m.

3:00 p.m. -
5:00 p.m.

OUR SPEAKERS

- **Borries Demeler**, University of Lethbridge, Professor, Department of Chemistry & Biochemistry
- **Amy Henrickson**, Department of Chemistry and Biochemistry, University of Lethbridge
- **Ariel Lindner**, INSERM/Université de Paris research unit (U1284 - Systems Engineering and Evolution Dynamics), Director
- **Paul Freemont**, Imperial College, Head of the Section of Structural and Synthetic Biology in the Department of Infectious Disease
- **Alexis Casas**, Imperial College London
- **Prof. Dr. Ulrike Köhl**, Fraunhofer Institute for Cell Therapy and Immunology (IZI), Director
- **Steve Rees, OBE**, AstraZeneca UK Ltd, Vice-President, Discovery Biology
- **Dr. Dirk Voelkel**, Cytiva Europe GmbH, Vice President, Innovation
